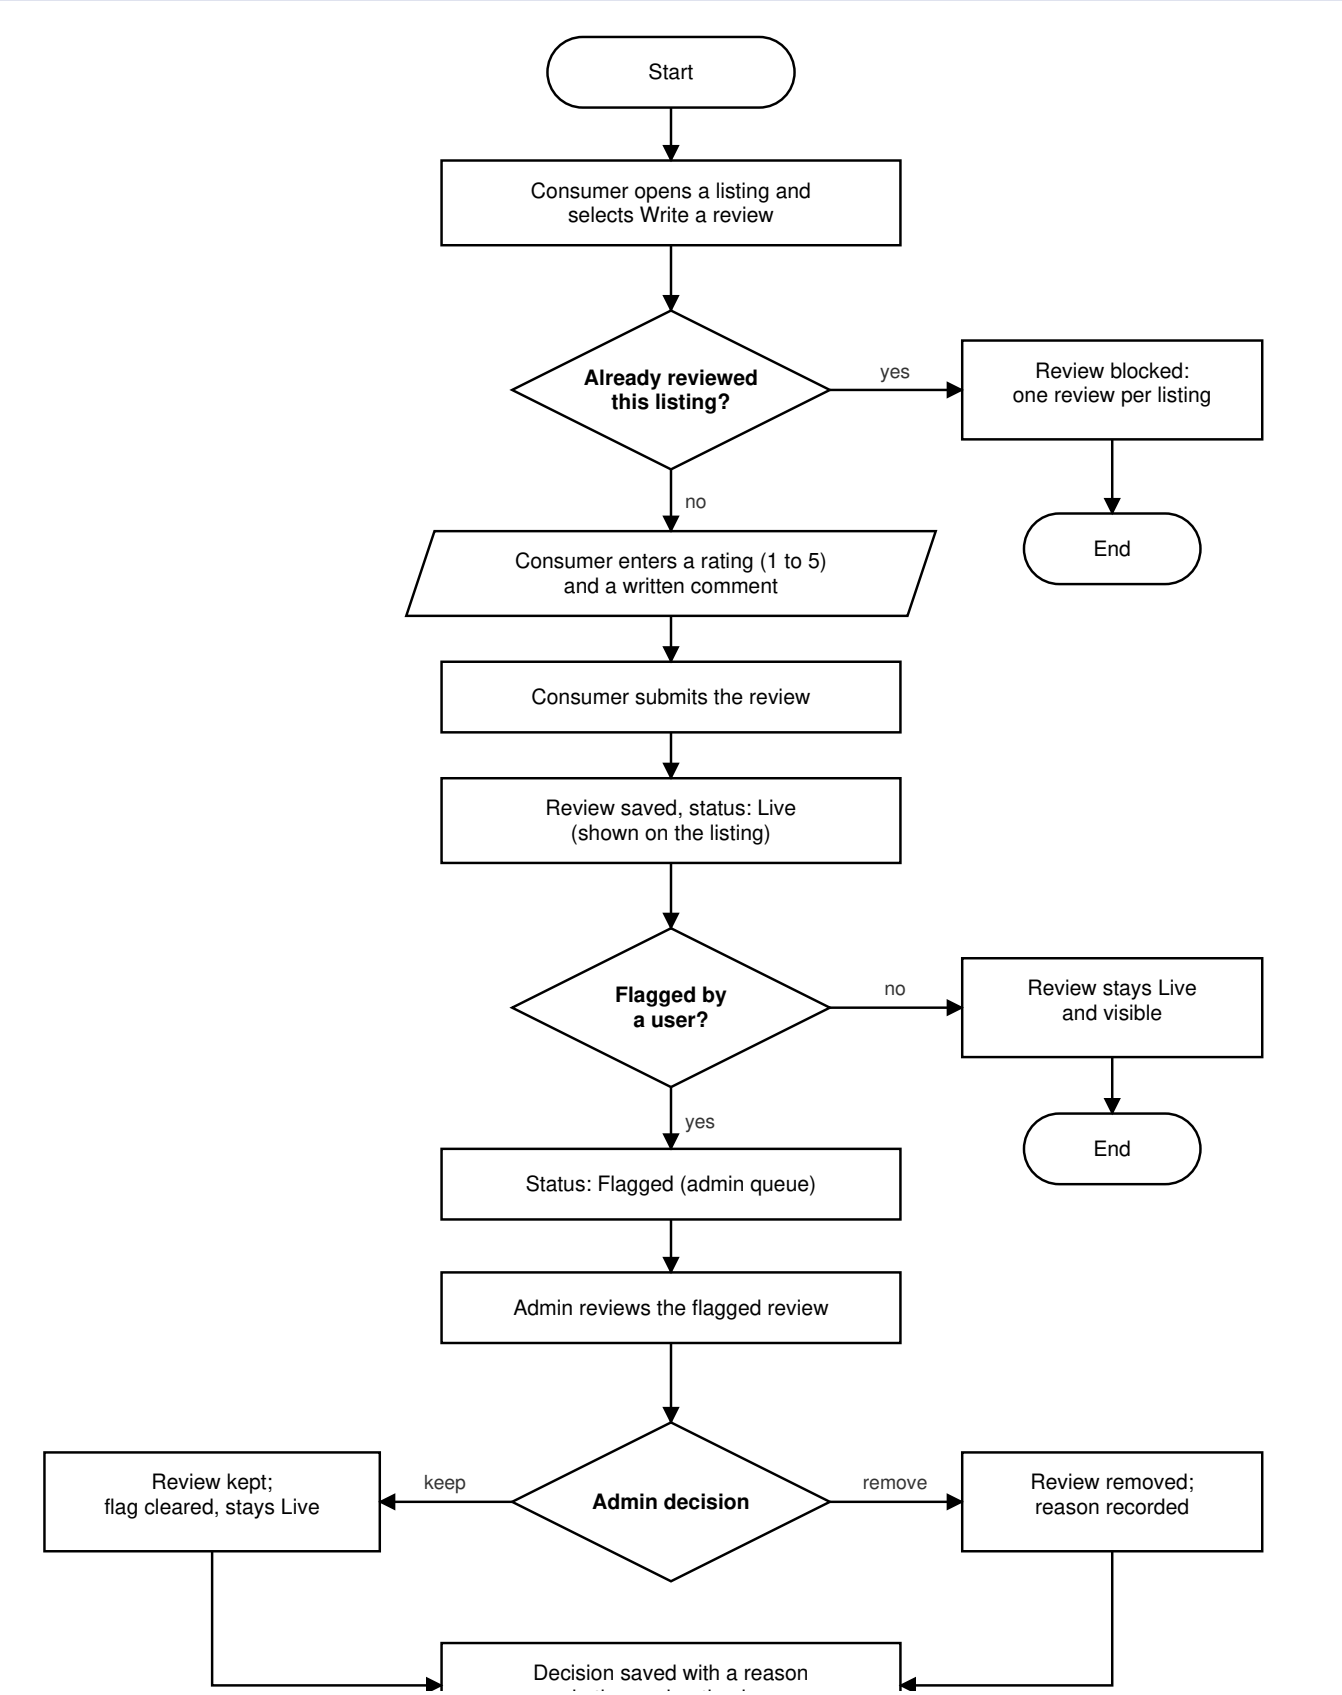
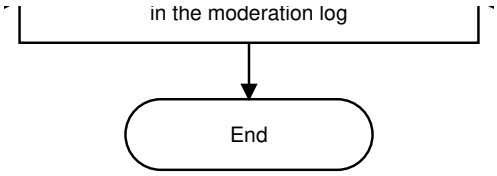
Review Submission and Moderation Flowchart

WBS 1.3.4 · MUSTmart · Group A · SWE3103





Symbols: rounded box = start or end, rectangle = process, parallelogram = input, diamond = decision. Design diagram drawn by the group for the System Design Document.

Design assumptions: a review goes live immediately and is checked only if flagged; any signed-in user can flag a review; every admin decision is saved with a reason (see mockups C5 and A3, and the reviews and moderation_actions tables in the ERD).
